

# COLOMBO

## *Model III / Touch Series System Upgrades*

*50 years of delivering results*

# Take back your tube system.

## THE HANDS OF TIME

Colombo Sales & Engineering was the first company to provide factual information that pneumatic tube systems are a critical link for the transport of Blood Specimens and Pharmaceuticals in a reliable, timely, and safe manner. While many systems that were installed over 30 years ago are still operational, they eventually require upgrading to current technology.

- Parts eventually wear out and fail.
- Parts are difficult to locate.
- Maintenance becomes a daily event and can be very costly.
- Systems become unreliable
- Skilled staff members start to transport critical items.
- Upgrading brings new life to your system at a fraction of the cost of replacing it.

## THERE'S A BETTER WAY

- Don't pay a company to fully replace the system at a large financial investment.
- Don't pay a company to upgrade the system and pay them software licensing fees.

- Enlist a company to upgrade your system that does specialize in providing upgrades.
- Have Colombo upgrade your system using all existing tubing and stations (no general construction work required).
- Colombo upgrades your system using state-of-the-art controls, with 5.5" touchscreen panels that are easy to use and require little training.

## FEATURES

- STAT transaction
- Auto-returns
- Administration and maintenance features
- Logging and carrier tracking

## OPTIONAL FEATURES

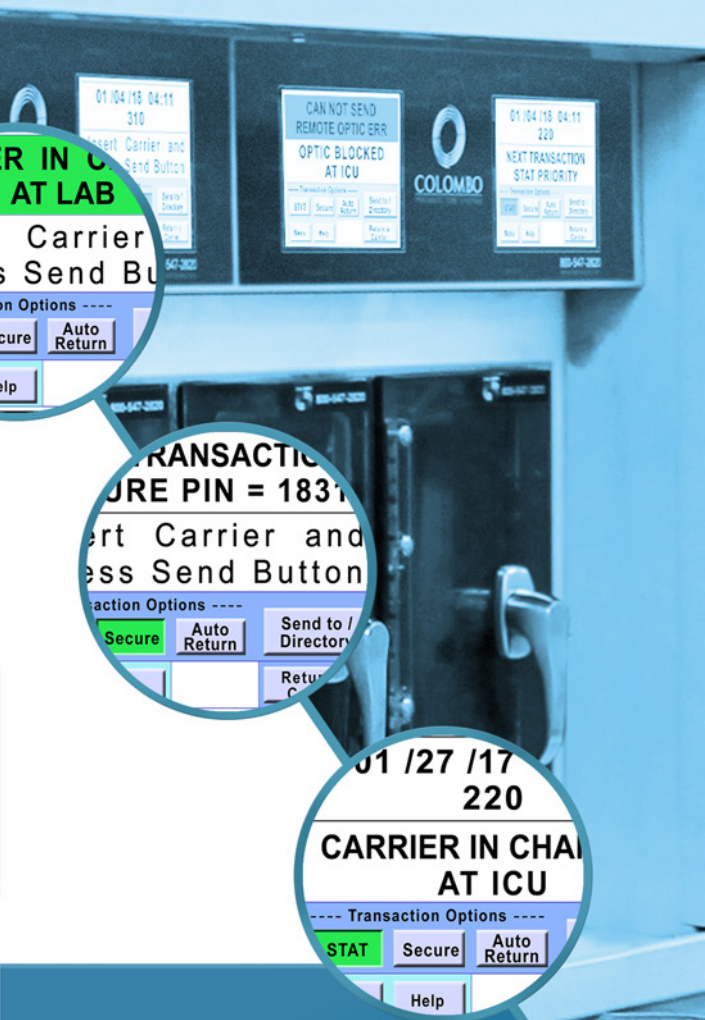

- Automatic door locking for secure transactions.
- Proximity card readers.
- Biometric security (thumb print access)
- Preventative maintenance plans to keep your system operating like new.

# Restore performance and reliability

## QUICK, COST EFFECTIVE AND SECURE

- In a matter of days, Colombo can revive your system and bring it into the 21st century for a fraction of the cost of replacement.
- Provide a retrofit of your existing system with digital controls and touch-screen operation.
- Provide safeguards to your system including chain-of-custody and accountability for sensitive items and controlled substances.
- Provide safeguards like card readers that insure only authorized staff members send or receive controlled substances.
- Biometric security ensures sensitive items don't end up in the wrong hands.

## UPGRADING IS THE BEST CHOICE

- ◆ Restore your system to better than new.
- ◆ Add state-of-the-art functionality.
- ◆ Provide user confidence in the system at a low cost.
- ◆ Faster Turn Around Times.
- ◆ Preventative Maintenance contracts availability.
- ◆ Optional software upgrades.
- ◆ A trusted name in quality products and service for five decades.
